

# Compatibility between the version of the programming software and the version of the firmware on the smart relay

 [About us](#)

## Introduction

The section below describes the compatibility between the versions of the programming software and the versions of the firmware on the smart relay.

## In the Case of a Transfer of the Program from the PC to the Smart Relay

In the case of a transfer of the PC program to the smart relay, all the versions of the programming software are compatible with all the versions of the firmware on the smart relay.

During transfer of the PC program to the smart relay, the firmware associated with the version of the programming software is transferred to the smart relay.

## In the Case of a Transfer of the Program from the Smart Relay to the PC

In the case of a transfer of the program from the smart relay to the PC, compatibility between the version of the programming software and the version of the firmware on the smart relay is as follows:

|                                            |      | Smart relay firmware version |              |              |              |
|--------------------------------------------|------|------------------------------|--------------|--------------|--------------|
|                                            |      | V2.xx                        | V3.xx        | V4.xx        | V5.0         |
| <b>Version of the programming software</b> | V2.4 | Compatible                   | Incompatible | Incompatible | Incompatible |
|                                            | V3.1 | Incompatible                 | Compatible   | Incompatible | Incompatible |
|                                            | V4.1 | Incompatible                 | Incompatible | Compatible   | Incompatible |
|                                            | V5.0 | Incompatible                 | Incompatible | Incompatible | Compatible   |

For more information on how to check the firmware version, refer to VERSION [Menu](#).
