IMPORTANT – Discontinuation of Erie Boiler Boss Product

SR601

BB3000

General Information

The Erie Controls Boiler Boss product range of zone control relays and residential hydronic system controls were introduced starting in 1995. This innovative line of residential controls were primarily used to control boilers, circulator pumps and multiple zones.

Due to difficulty in obtaining key components, manufacturing issues, and declining sales volumes, the Boiler Boss product family will be discontinued immediately. These devices were primarily sold thru the wholesale distribution channel.

Cross Reference for Discontinued Products

Many of the Boiler Boss products can easily be crossed to similar products from other manufactures. Literature for the Boiler Boss family will continue to be available on iPortal.

Warranty for Discontinued Products

Warranty will be supported by a credit to the buyer's account at the lowest net invoice amount over the previous 12 months.

Additional Information

Please contact Customer Care at 888-444-1311 or visit iPortal for additional information.

AFFECTED PART NUMBERS

Affected part numbers	Description
BB3000	Indoor/Outdoor reset injection pump mixing control
BB3600	Indoor/Outdoor reset 3- or 4-way valve mixing control
