

- 1) On the Ecoeach home screen click on “Launch Device Discovery”.

- 2) On the “Device Discovery” screen enter the Modbus slave address and click on “Find Devices” to discover the devices connected as Modbus slaves.

- 3) Now, click on “Find Devices” to discover the devices connected to the gateways and the Modbus slaves.

Discover Devices					
← Device List - 7 Found					
✓	CONNECTION ↑	DEVICE ADDRESS	CONNECTION TYPE	DEVICE TYPE ↑	DEVICE NAME
✓	10.179.247.151	255	Modbus TCP/IP	IFE
