

A man and a woman are standing in a large industrial facility, possibly a factory or power plant. The man, on the left, is wearing a light blue button-down shirt and dark trousers, with a lanyard around his neck. The woman, on the right, has long dark hair and is wearing a light-colored button-down shirt and khaki pants, also with a lanyard. They are both looking at a tablet held by the woman. The background shows industrial equipment, metal railings, and overhead lighting. The overall tone is professional and technological.

Digital Service Plans

Improve Energy Performance and
Facility Reliability

schneider-electric.us/powerandenergy

Life Is On

Schneider
Electric

Now you can increase facility reliability, extend equipment life and improve energy performance without spending any time doing it!

Digital Service Plans are designed to provide maintenance, support and improvement services for your power management system. Now you can easily manage your electrical system and keep your operations running smoothly without needing extra time or man-power to do it.

With our advanced analytical tools and dedicated experts, we can help you to not only detect hidden problems, but to solve them in the most efficient way possible. Easy-to-use reports identify pertinent issues and provide insights and actionable recommendations from our experts.

Benefit from the expertise of a dedicated, expert engineer

Our engineers partner with you to conduct maintenance, address alarms, and optimize your system.

Gain insight with Power Advisor

Access the benefits of Power Advisor, a key component of digital service plans that is the analytical engine that turns your data into information. Using data from your power monitoring software, it combines advanced algorithms with expert analysis, and provides the insight that you need to make the right decisions.

Enjoy full-system analysis and ensure your power management system is providing accurate data you can count on. Whether validating a new expansion or reviewing existing equipment, we can help you understand, correct and optimize your system.

Additionally, Power Advisor will analyze your electrical network for problematic power quality conditions that may cause equipment or reliability issues. Our specially trained team will help identify areas for improvement and work with you to develop a resolution.

Leverage Our Onsite Maintenance Program

If you're like most facility professionals, managing energy isn't your only priority. Bring our team onsite to provide regular, proactive maintenance, troubleshoot a complex issue and perform system updates.

Power Advisor Report

Digital Service Plan Features

- Your own dedicated engineer
- Diagnostic reports on your metering system health
- List of detected equipment issues and potential causes
- Real-time power monitoring
- Opportunities to increase energy efficiency and savings

Add Our Energy Experts to Your Team

The right people make all the difference. Let our highly skilled energy managers and professional engineers with backgrounds in energy management, computer science, and power systems partner with your in-house staff to conduct maintenance, address alarms, and optimize your system for results you'll see from day one.

Digital Service Plans

	Standard	Prime	Ultra
