

**Schneider Electric Industries
Global Supply Chain - Environment
Rohs Project**

Date: 8/21/2014

Dear Customer,

Although most Schneider Electric products are not directly within the scope of the RoHS European Directive, as part of Schneider Electric's sustainable development policy, we are working to reduce the use of RoHS banned substances throughout our product offering. The information below provides the current product status as of the date of publication of this present document.

As new products are released and product design changes are implemented, this information will be updated.

The information is based upon the RoHS Directive with exemptions in effect July 22nd, 2011. Any future changes to the Directive or the list of exemptions may change the status reported here.

In the context of the sustainable development policy of our Company we continuously work towards products and services which reduce the impact to the environment or human health when used for their intended purpose and in conditions stated in the documentation provided by Schneider Electric. At end of life, we recommend that you follow appropriate waste and recycling procedures.

Please Note: You can find more information about Schneider Electric environmental commitment on www.schneider-electric.com

Best Regards

Alain Digeon
