How to activate the license

Replace the old LMBrick files with V1.8 version

3 Download and copy the LMBrick V1.8

Note: For SoM/SoMM <=V4.2, the LMBrick needs to be updated to V1.8

- **Download** the **LMBrick file** attached in your email.

- **Copy** the three LMBrick files of version V1.8.

4 Replace the old LMBrick files with V1.8 version

- **Navigate to the Target Folder:** Paste the copied files into the following folder to replace the older version:

C:\Program Files (x86)\Schneider Electric\SoMachine Software\V4.x\LogicBuilder\Common

- **Adjust the Folder Path:** Replace **V4.x** in the folder path with the version installed on your PC.

Note: Ensure you type the correct version number installed on your PC to access the folder. Example:
