Re: Support for SysLog on the ION8600

To whom it may concern:

Power Measurement Ltd, now wholly owned by Schneider Electric has been in the business of designing, manufacturing and selling high accuracy multi-function power meters for revenue metering applications in both ANSI and IEC markets for over 16 years. The ION8600 meter has been directly replaced by the ION8650 meter and is no longer being actively manufactured. However, Schneider Electric intends to release one final firmware in 2016 to support the latest display hardware that will ensure the meter can be supported in the field for up to 10 years.

The ION8650 is under continuous development since its release in 2012. New features and improvements have been released in the form of firmware updates and minor hardware improvements. The current shipping firmware V4.20 introduced the support for SysLog. This feature will not be available on the ION8600 meters.

We (Schneider Electric) hope this information is helpful for your needs. If you have any further questions regarding this letter, please don't hesitate to contact me.
